

A Batch Process Plant

Jung Moon

Sunkyong Engineering and Construction

This batch process plant was created by using an Intergraph 6280 workstation and Intergraph's PDS, MicasPlus, and MicroStation. It was rendered with ModelView.

Navy Pier

*Gary Walton, Chris Lamberth, Terry McGowan
and Steve Thompson*
RUST Engineering

The Rust Visualization Group created this computer animation of the Navy Pier Development project for the Metropolitan Pier and Exposition Authority, Chicago, Illinois. They used an InterPro 6280 and 2020 to create this animation with a combination of ModelView and NetVideo software.

Night Gallery

David A. Maloney
Super Sky Products

Working late one night, the artist started the model as a single door. The chandelier, stairs, and banister soon followed. The ghosts built themselves in later that night. Scanned images are from an early 1900s version of Dante's *Inferno*.
